Anshul Sharma

anshuls235@gmail.com | Kaggle | Medium | GitHub | LinkedIn

Data Science Manager and Kaggle Master with 10+ years designing, building, and shipping production AI, spanning data pipelines, predictive modeling, and more recently Generative AI and agentic systems at enterprise scale. I'm equally comfortable architecting solutions hands-on and leading cross-functional teams, and I own the end-to-end lifecycle: from strategy through cloud-native deployment on Azure and Databricks to measurable business outcomes.

Work Experience

Data Science Manager — **JUL 2025 — Present**
Al-Futtaim Automotive — *Dubai, UAE*

- Built **Automall AI Search**, a multilingual (English/Arabic) car-search system on **LangGraph**, **FastAPI**, and **Azure OpenAI** with intent classification, multi-parser NLP routing, and progressive relaxation, backed by **Databricks** pipelines and **Power BI**; live since April 2026, it has driven 10 orders at under $70 total operating cost.
- Architected the **Automall WhatsApp AI Chatbot** (LangGraph + Infobip) spanning intent classification, **FAQ RAG**, live-agent handoff, sell-car flow, and **SAP C4C CRM** integration; live since March 2026, it has generated 25 orders at under $200 cumulative cost.
- Built a real-time **lead scoring** model that scores each lead on creation, combining historical data with **Google Analytics** behaviour signals to fast-track high-quality leads to a showroom visit, bypassing the call center and accelerating lead-to-opportunity conversion.
- Developed **IFRS 9 Expected Credit Loss** models for automotive lease portfolios: a **PD** model on **H2O Driverless AI (AutoML)** with Databricks feature engineering, plus analytical **LGD/EAD** estimation for regulatory-compliant credit-risk reporting.

Senior Data Scientist — **JUL 2022 — JUN 2025**
Gartner — *Gurugram, India*

- Led **GenAI** seller-productivity initiatives: a Recruitment Studio resume screening tool with **LLMs (Mixtral 8x7B, Llama2 70B)** and a **Mistral 7B Instruct RAG** chatbot, boosting internal knowledge access by **40%** and cutting complex-query response time by **60%**.
- Automated quarterly growth-forecast ML workflows, cutting turnaround from **14 days** to **4 hours** and saving **10,000+ person-hours** monthly; optimized **PySpark** pipelines from **12 hours** to **12 minutes** via an **MLflow** MLOps framework.
- Engineered a neural-network workload index for **5,000 sellers** and automated the NPV territory-investment model, eliminating **20 Excel sheets** and reducing **3 weeks** of monthly effort to **5 minutes**.

Senior Data Scientist — **JAN 2021 — JUL 2022**
S&P Global — *Gurugram, India*

- Pioneered a **Vehicle Miles Traveled** product generating **$300k** phase-1 revenue across **20 global markets** using **LightGBM** and **Random Forest**, served via a **CI/CD serverless AWS** architecture adopted as a blueprint by other teams.
- Led data acquisition across **50+ websites** and **10+ sources** (Oracle, Hadoop, MongoDB), deploying large-scale crawlers to make data actionable for stakeholders.

Developer / Associate Developer — **AUG 2015 — JAN 2021**
SAP Labs India — *Gurugram & Bengaluru, India*

- Replaced a manual rule-based mapping system with a **Random Forest Classifier**, achieving a **200% speed increase** in deriving automotive attributes, and built predictive models on **SAP DSiM** supply-chain analytics (**BW/HANA**).
- Engineered **ETL pipelines** and **REST APIs** automating data transfer to **SAP BW**, doubling performance metrics and enhancing reporting.

Technical Skills & Expertise

Generative & Agentic AI	:	LLMs, Azure OpenAI, LangGraph, LangChain, LlamaIndex, RAG, Agentic Workflows, LLM Fine-tuning, Prompt Engineering
ML & Data Science	:	scikit-learn, XGBoost, LightGBM, PyTorch, Keras, Hugging Face, H2O Driverless AI (AutoML), Google Analytics (GA4), Pandas, NumPy
Cloud & MLOps	:	Azure (AKS, App Service, ADF, APIM, Entra ID, Key Vault, Cognitive Services), Databricks, Cosmos DB, AWS (SageMaker, Lambda, Step Functions, ECS/ECR), Docker, Terraform, MLflow, Azure DevOps, Jenkins
Languages & Tools	:	Python, SQL, PySpark, Git, Shell scripting, VS Code, PyCharm, Jupyter
Web & Visualization	:	FastAPI, Flask, Django REST, Streamlit, Gradio, React, Power BI, Tableau, Plotly, Matplotlib, Seaborn

Education

BTech in Electronics & Communication, *Delhi Technological University* — 2011 — 2015
Machine Learning Nanodegree, *Udacity* — 2019
Data Analyst Nanodegree, *Udacity* — 2018
